Senior Environment Officer,  
Government of Jersey

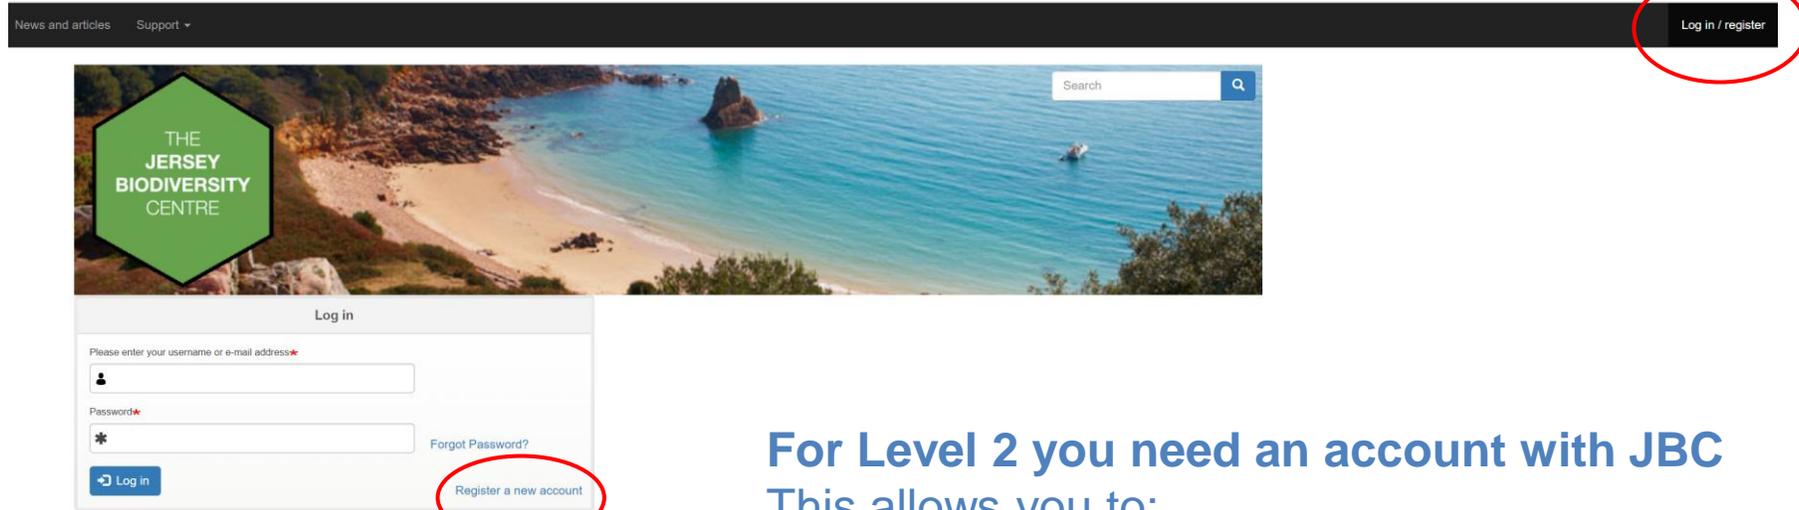

17<sup>th</sup> February 2024

amphibian and reptile  
conservation

# Level 2 – submit your data

The screenshot shows the website header with 'News and articles' and 'Support' links. A search bar is visible. The main content area features a banner for 'THE JERSEY BIODIVERSITY CENTRE' over a coastal landscape. Below the banner is a 'Log in' form with fields for 'Please enter your username or e-mail address' and 'Password', a 'Log in' button, and a 'Forgot Password?' link. A red circle highlights the 'Log in / register' link in the top right corner and the 'Register a new account' link at the bottom right of the form.

**For Level 2 you need an account with JBC**  
This allows you to:

- Submit your survey findings
- Casual records
- Explore your records

Welcome to the Jersey Biodiversity Centre

## Enter your wildlife sightings

Explore Jersey's wildlife and get closer to nature.

We are a charity that collects, manages and shares information about all aspects of Jersey's wildlife, ecology and natural environment.

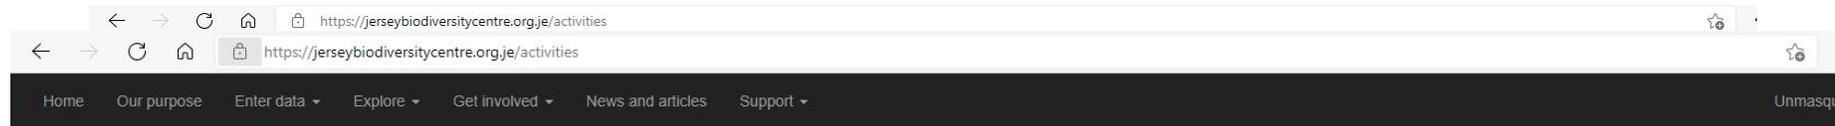

Use this site to enter your latest wildlife sightings and get involved with our nature events and surveys.

If you sign up for Level 2 activities, you will receive an email to join the activity.  
You can also request to join the activity from the activity page

Once approved - you'll have access to the survey here

Click > **Pondwatch JE – level 2** survey form. This will direct you to the survey form.

## Activities

Get involved with wildlife recording in Jersey!

To create your own personal activity click 'My Activities'. So see our range of wildlife spotting events click 'Browse all Activities'

About the activity	Members	Links	Actions
 <b>Pondwatch JE - Level 2</b> Pondwatch JE is a project that aims to gather sightings of Jersey's pond life to help assess their conservation status, distribution and habitat requirements. Level 2 – carry out 5 surveys, each taking 30 to 60 minutes. You will search for amphibians and other pondlife at a pond using three methods; visual searches, netting and night time torch surveys. You do not need experience but you will need to attend a training event.	18	<a href="#">Pondwatch JE - Level 2</a>

# Pond registration details for Pondwatch level 2

## Pond details

### Pond name:

La Carriere

Provide the name, address or reference number of the pond.

### Pond location:

Les Blanches Banques

Address or description.

### Pond grid reference:

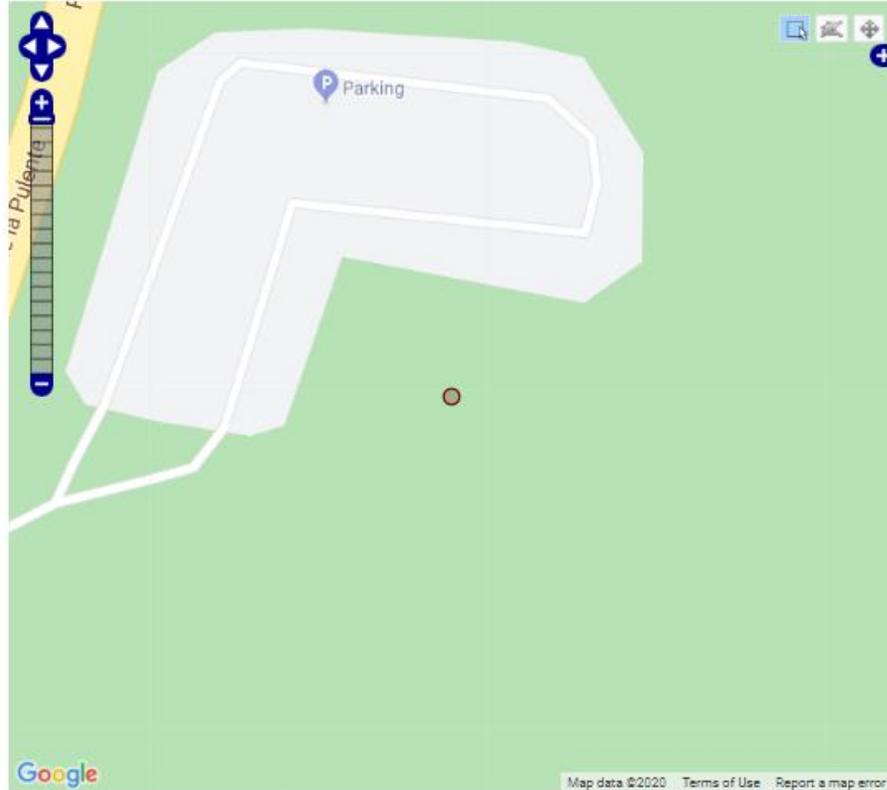

49.19471N 2.22412W

WGS84 (decimal lat, long)

### Or search for a place on the map:

Search

Unsupported control [locAttr:237]

Have you completed a Landowner Survey Consent Form?

Tick if a form has been completed.

### Type of pond:

- Formal garden pond
- Farm pond
- Natural pond
- Wild garden pond
- School pond
- Reservoir
- Fish pond
- Golf course pond

### Pond construction:

- Liner
- Concrete
- Preformed plastic
- Clay
- Other

## Pond habitat suitability assessment

### Pond area:

When water is at its highest level. (Look for where wetland vegetation (e.g. rushes) stops).

### Number of years in ten pond dries up.:

Never dries; Rarely dries: no more than two years in any ten-year period, or only in drought; Sometimes dries: dries between three years in ten to most years; Dries annually. Estimate or ask landowner.

### Water quality:

Bad = clearly polluted, only pollution-tolerant invertebrates, no submerged plants; Poor = low invertebrate diversity, few submerged plants; Moderate = moderate invertebrate diversity; Good = abundant and diverse invertebrate community. (Choose one option)

### % perimeter shaded:

Percentage perimeter shaded (to at least 1 m from shore). Estimate.

### Waterfowl impact:

Major = severe impact of waterfowl i.e. little or no evidence of submerged plants, water turbid, pond banks showing patches where vegetation removed, evidence of provisioning waterfowl; Minor = waterfowl present, but little indication of impact on pond vegetation, pond still supports submerged plants and banks are not denuded of vegetation; None = no evidence of waterfowl impact (moorhens may be present).

### Fish present:

Major = dense populations of fish known to be present; Minor = small numbers of crucian carp, goldfish or stickleback known to be present; Possible = no evidence of fish, but local conditions suggest that they may be present; Absent = no records of fish stocking and no fish revealed during survey(s).

### Number of ponds within 1km:

Number of ponds within 1 km not separated by barriers to dispersal. Check with Natural Environment or use a map (e.g. Google Maps satellite) to estimate.

### Terrestrial habitat:

None = clearly no suitable habitat within immediate pond locale; Poor = habitat with poor structure that offers limited opportunities for foraging and shelter (e.g. amenity grassland); Moderate = offers opportunities for foraging and shelter, but may not be extensive; Good = extensive habitat that offers good opportunities for foraging and shelter completely surrounds pond e.g. rough grassland, scrub or woodland.

### Aquatic vegetation:

Percentage of pond surface occupied by aquatic vegetation (March–May). Estimate.

Note: the aquatic vegetation is assessed March to May

## Surrounding habitat assessment

Tick the three most dominant habitat types falling within 0–5 m and 0–100 m of the pond perimeter (the maximum water level) used to assess calculate the pond area.

0 - 5m	0 - 100m	Habitat
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Acid grassland
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Calcareous grassland
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Neutral grassland
<input type="checkbox"/>	<input type="checkbox"/>	Modified grassland
<input type="checkbox"/>	<input type="checkbox"/>	Broadleaved mixed and yew woodland
<input type="checkbox"/>	<input type="checkbox"/>	Coniferous woodland
<input type="checkbox"/>	<input type="checkbox"/>	Dwarf shrub heath
<input type="checkbox"/>	<input type="checkbox"/>	Hedgerows
<input type="checkbox"/>	<input type="checkbox"/>	Dense scrub
<input type="checkbox"/>	<input type="checkbox"/>	Bog
<input type="checkbox"/>	<input type="checkbox"/>	Fen marsh and swamp
<input type="checkbox"/>	<input type="checkbox"/>	Arable and horticulture
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Built-up areas and gardens
<input type="checkbox"/>	<input type="checkbox"/>	Inland rock
<input type="checkbox"/>	<input type="checkbox"/>	Supralittoral rock
<input type="checkbox"/>	<input type="checkbox"/>	Supralittoral sediment
<input type="checkbox"/>	<input type="checkbox"/>	Standing open water and canals
<input type="checkbox"/>	<input type="checkbox"/>	Rivers and streams

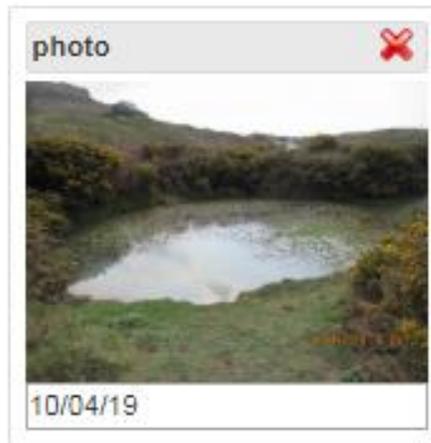

Please provide any photos of the pond and its general environment below. If you have any photos that relate to the pond conditions during one specific visit then you can add the photos to the visit details form.
